# How EPM Can Help Institutions Adapt and Overcome in Challenging Times

December 8, 2020

---

**Nicole Engelbert**

Vice President, Higher Education Development

**Marc Seewald**

Vice President, EPM Product Management

## Safe harbor statement

---

The following is intended to outline our general product direction. It is intended for information purposes only, and may not be incorporated into any contract. It is not a commitment to deliver any material, code, or functionality, and should not be relied upon in making purchasing decisions. The development, release, timing, and pricing of any features or functionality described for Oracle's products may change and remains at the sole discretion of Oracle Corporation.

## Agenda

---

- Out of crisis, an opportunity for transformation
- Oracle connected finance (EPM)
- Q&A

## Out of crisis, an opportunity for transformation

---

Nicole Engelbert

Vice President

Higher Education Development

## An industry on the brink

**16.1%** YoY decline in FAFSA completion

**252k** COVID-19 cases on college campuses

**484k** Institution jobs lost since COVID-19

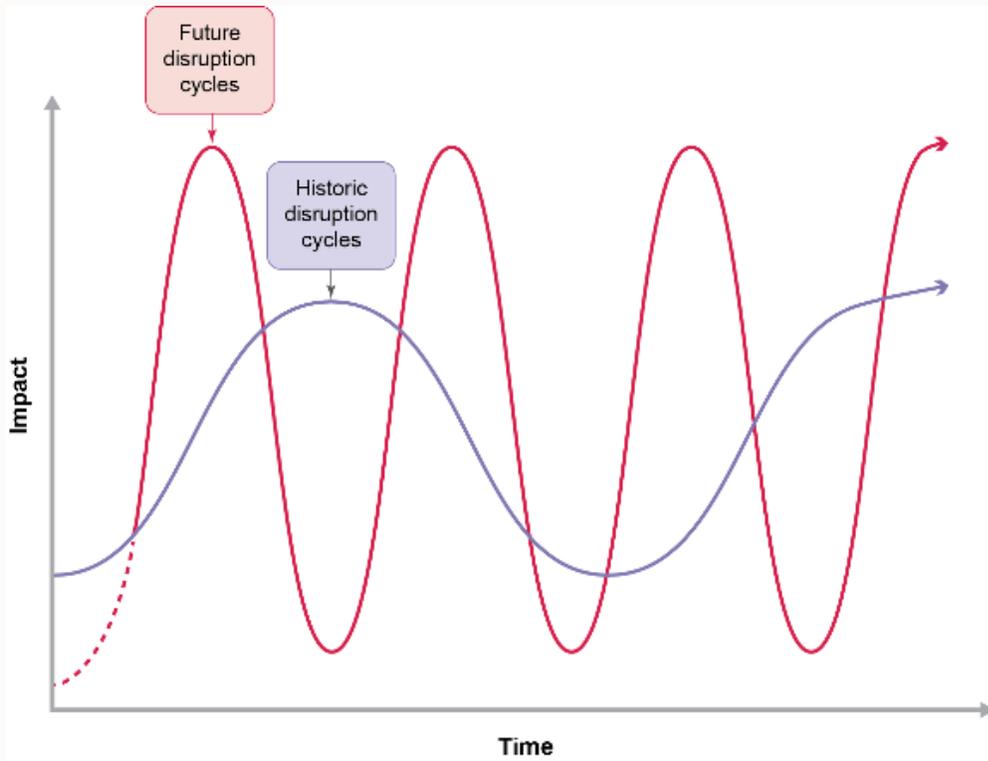

**\$120bn** ACE estimate of COVID-19 cost

**9.5%** Community college enrollment decline

**43%** Drop in new international students

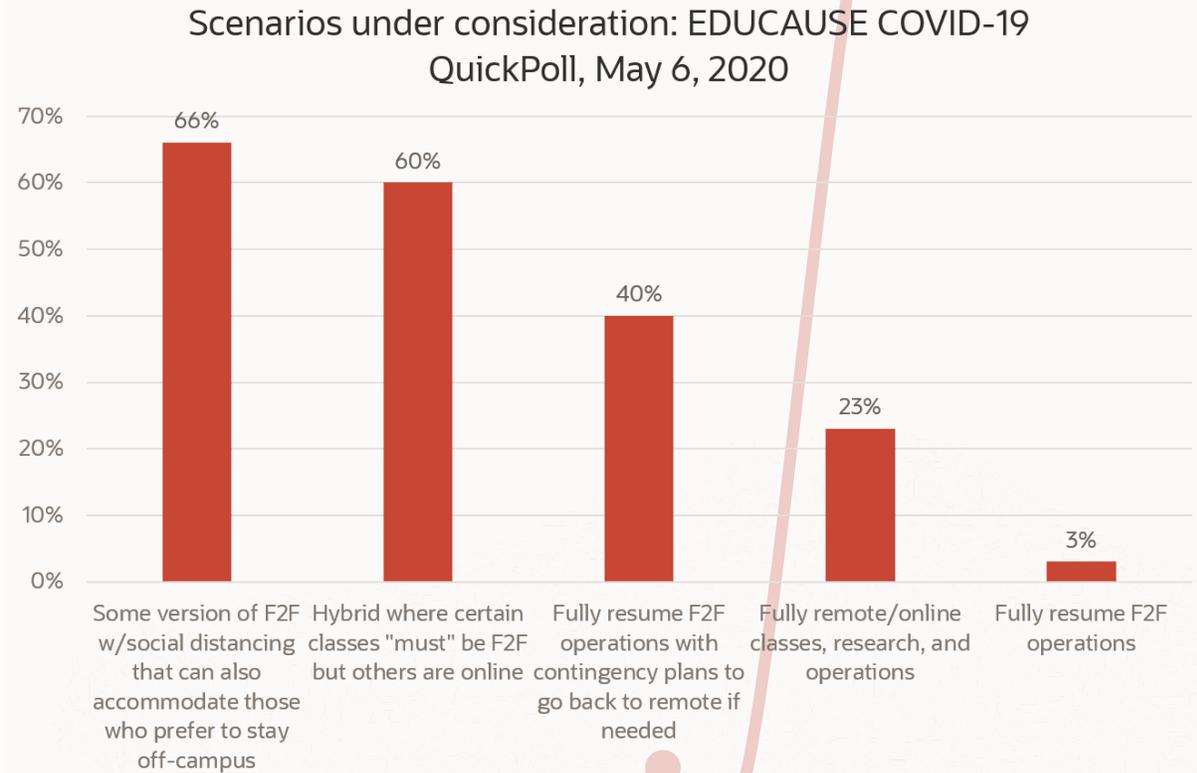

# Forecasted change cycles no longer apply

## Pre-March 2020 change cycles

Ovum, Digital Economy 2025: A view from the industry perspective

## Post March 2020 change cycles

## Disruption for the few to dislocation for the many

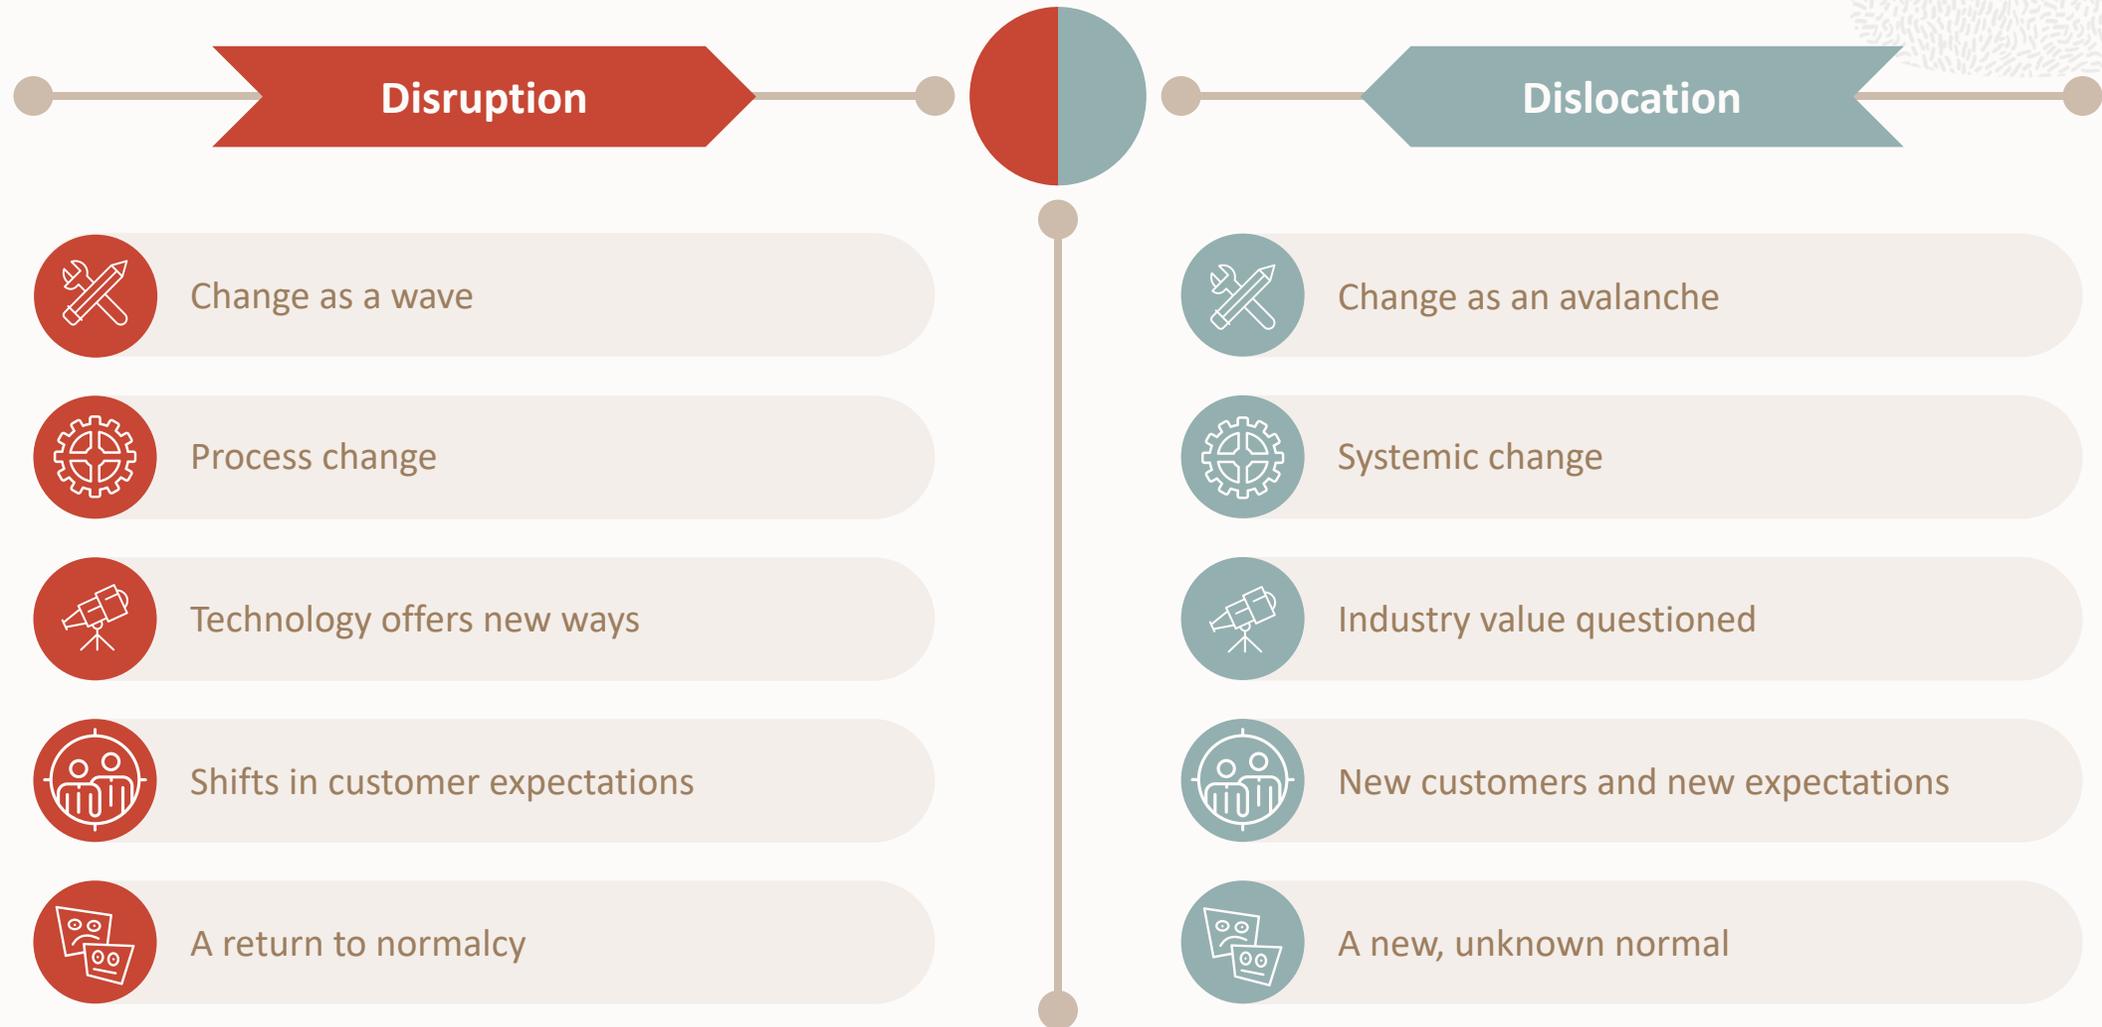

+ COVID-19 =

Slow growing student dislocation  
drives disruption at the margins

Sudden industry-wide  
dislocation destabilizes its  
economic & cultural position

# But planning should be for dislocation, not disruption

# Possible scenarios

## Closures & consolidation

- Public budgets contract driving consolidation and closures
- Private institutions on the precipice close or merge

## New operating models

- [Beloit College](#) moves to 7-week terms, Bentley trimester
- Intentional hybrid or fully online, Cambridge University
- Academic networks

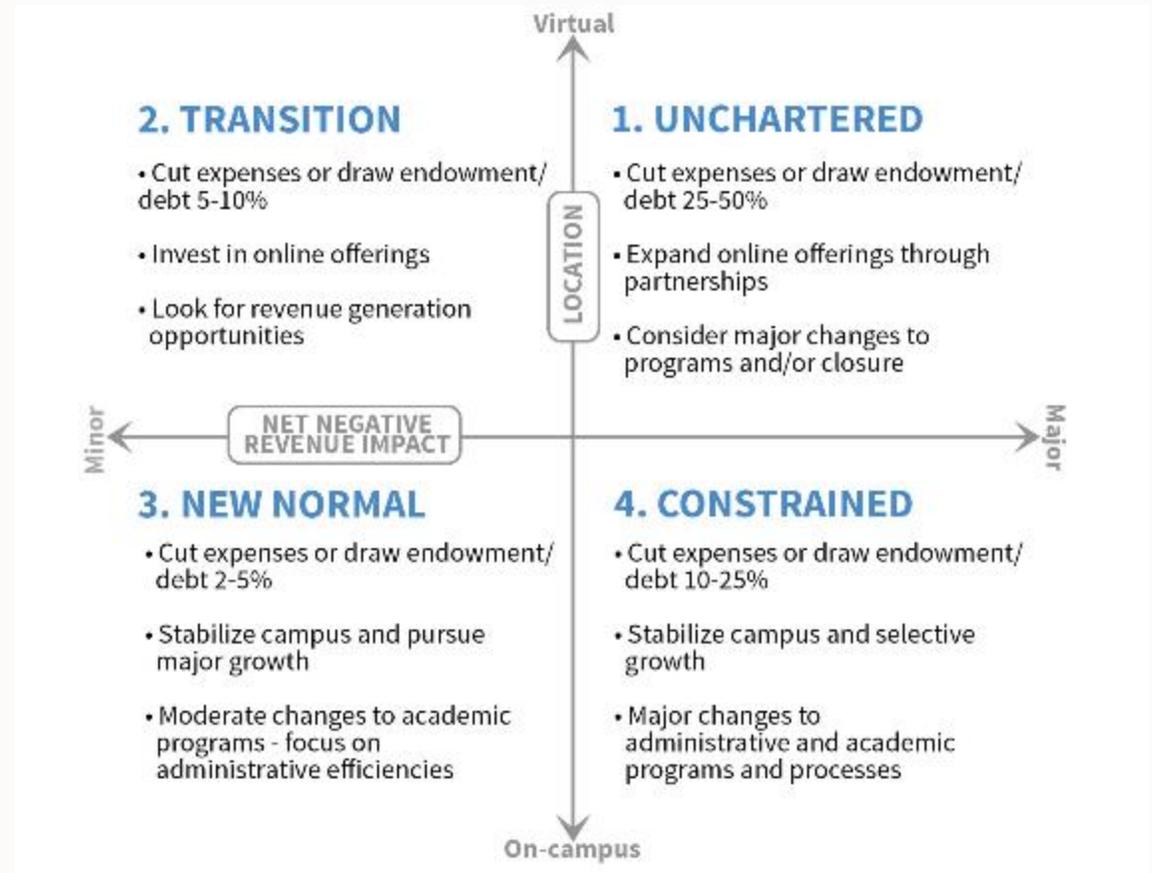

## Shifting enrollment patterns

- Who will arrive “on campus” this fall?
- Growth of mega-universities accelerates
- Fiscal priorities shift – “keeping the lights on” vs “shining city on a hill”

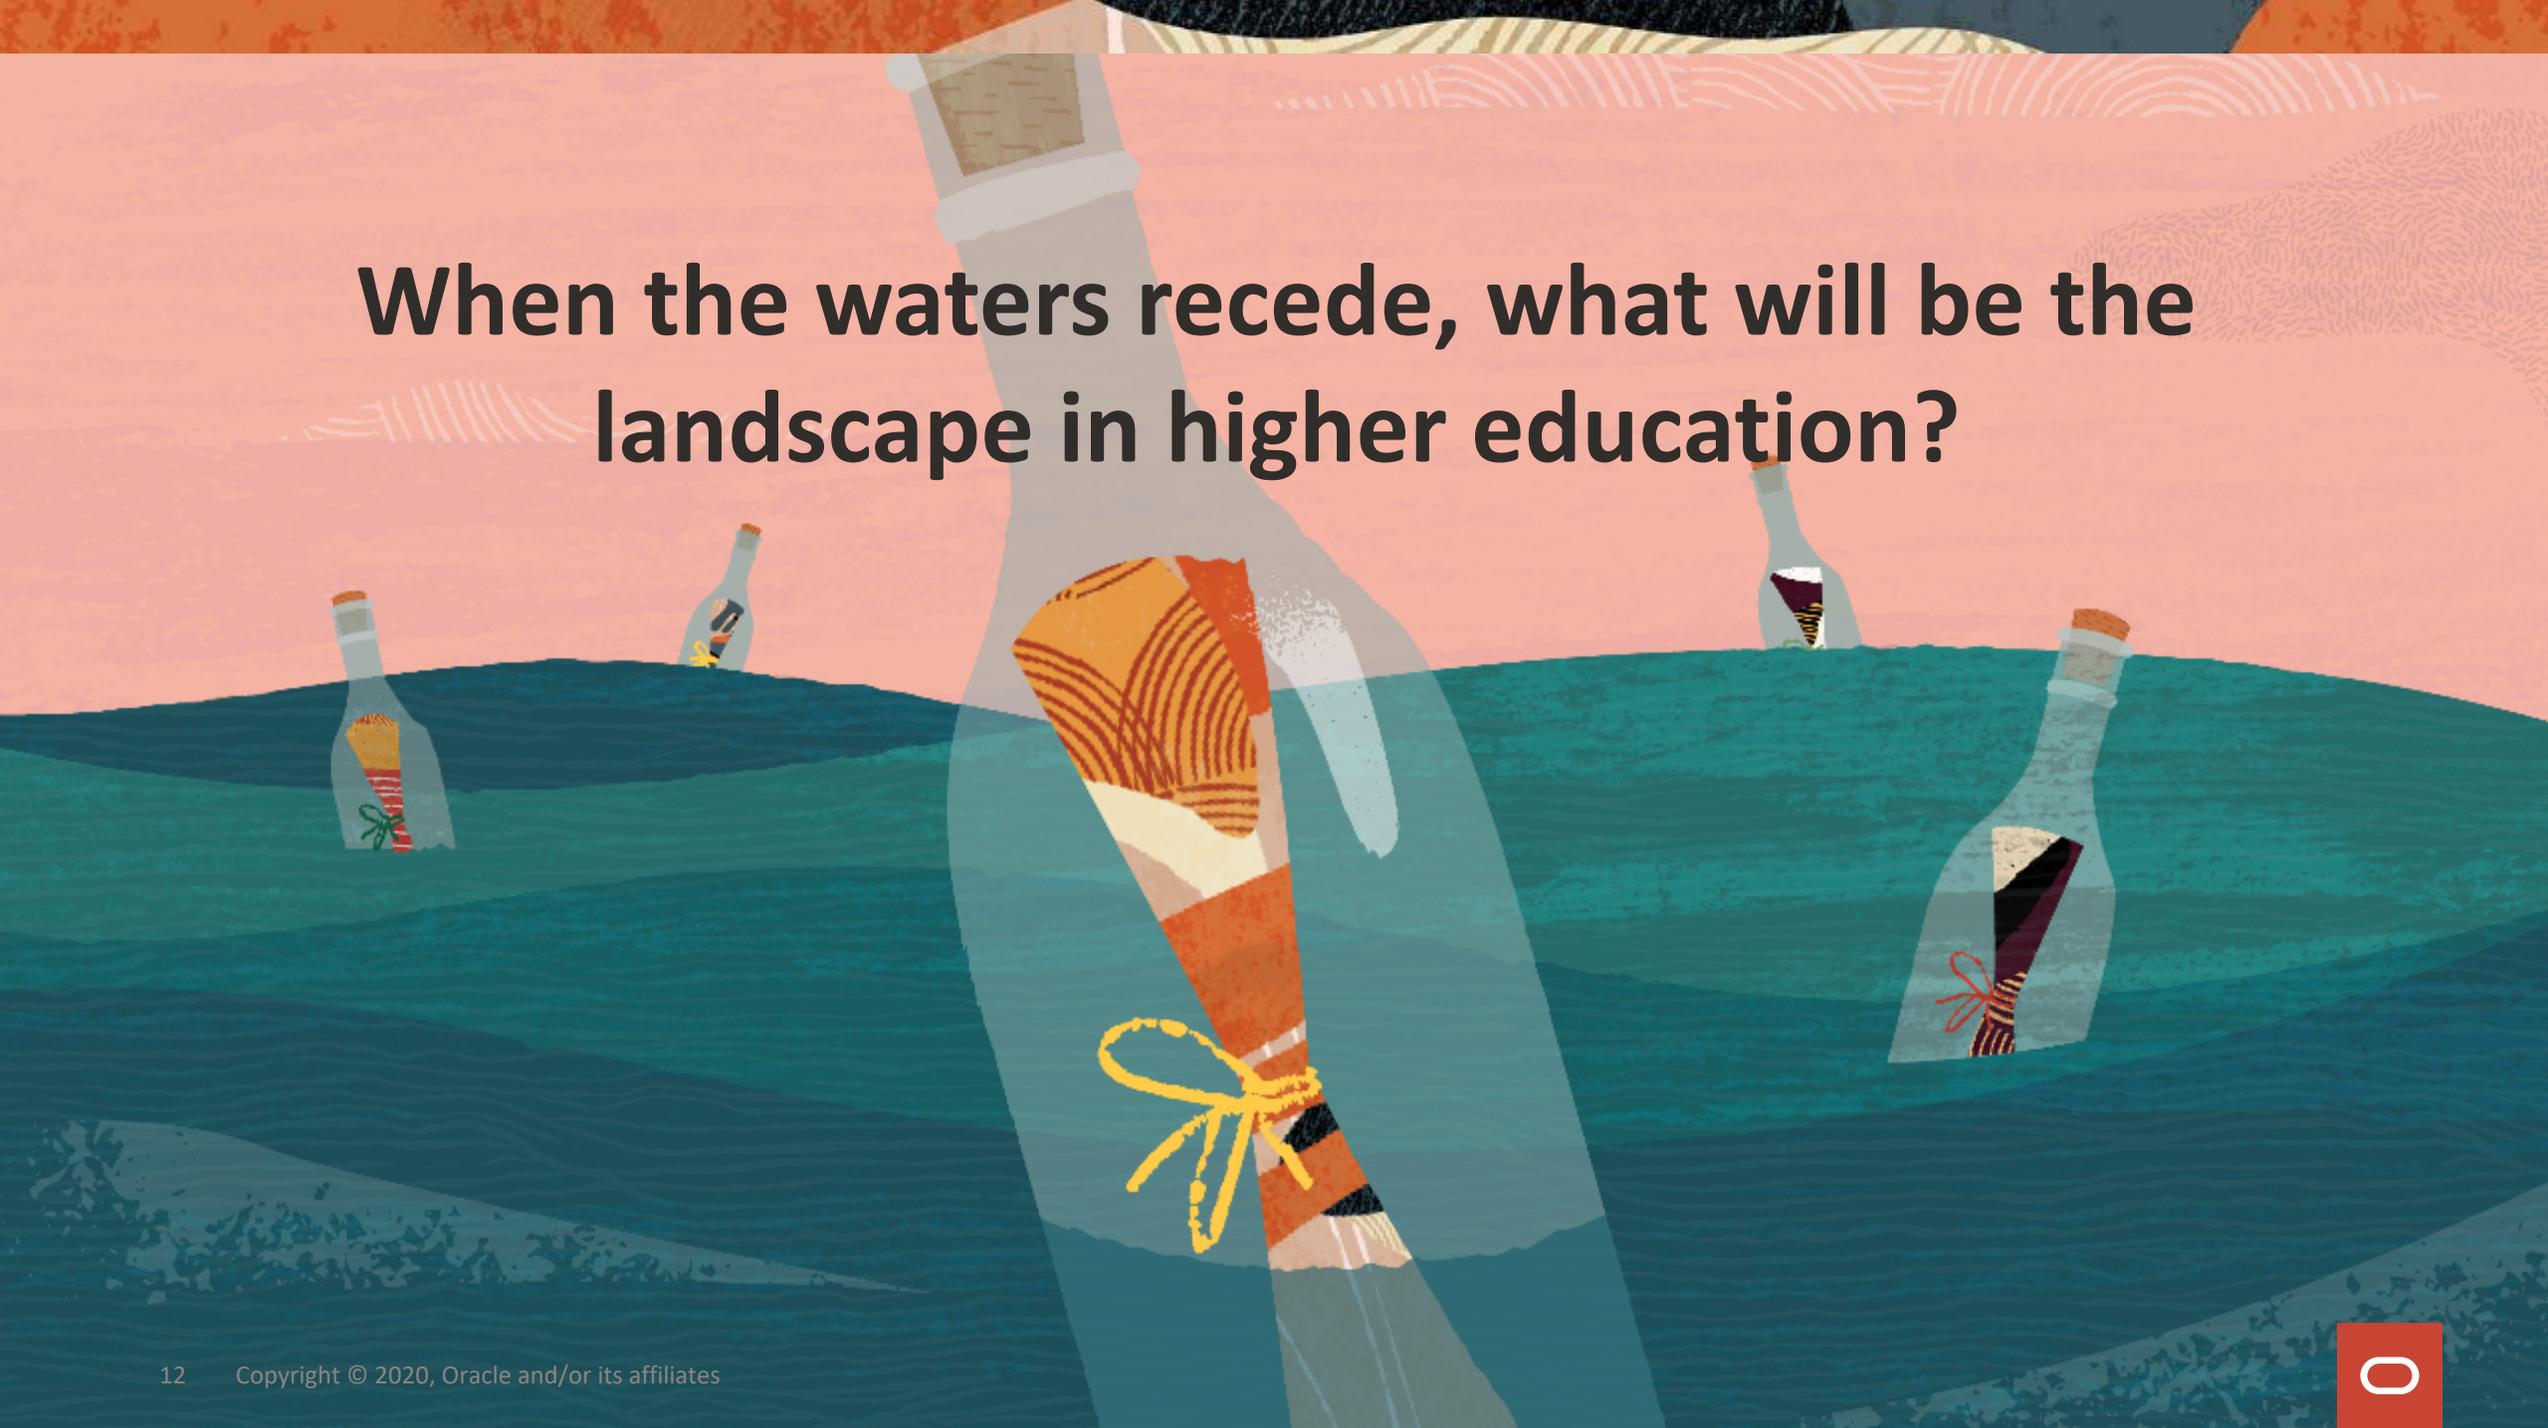

## A new kind of student experience

- Lower order Hierarchy of Needs
- First year students less wed to their institution

## ABC Insights, Preparing Your budget with Coronavirus in Mind

# When the waters recede, what will be the landscape in higher education?

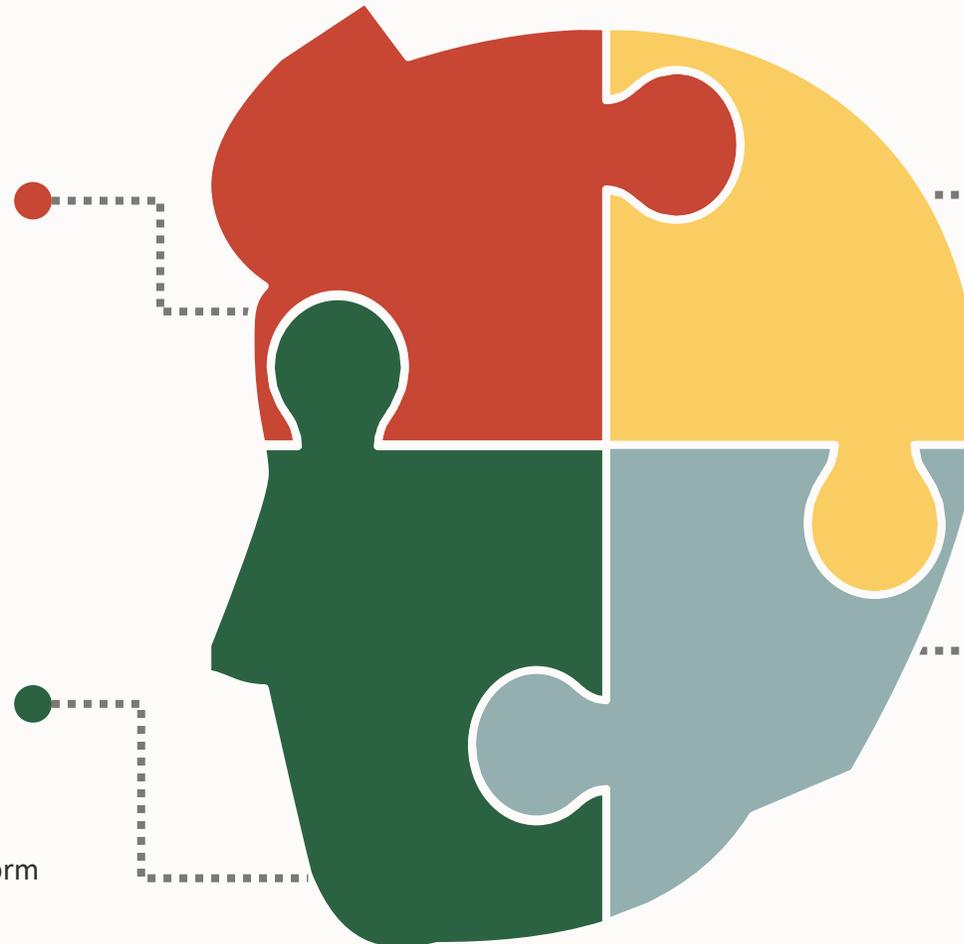

# Institutions will demand agility, sustainability, and insight

## Intelligent automation

- Things may need to change
- How would we change?
- Tools, system, processes

## Tools to survive, then thrive

- Strategic Modeling
- HCM Care Package
- Curriculum registry, single platform

## Back office centralization

- Gain economies of scale
- Shared Services
- Examples: Green Mountain, PASSHE, Dallas College, HESS/E&I, Multi entity capabilities

## Consumer market sensibilities

- Anytime/anywhere access to information - mobility/security
- Voice-based interaction with systems – Digital assistants
- Curated interaction with systems and processes – next best action enabled by AI/ML technologies

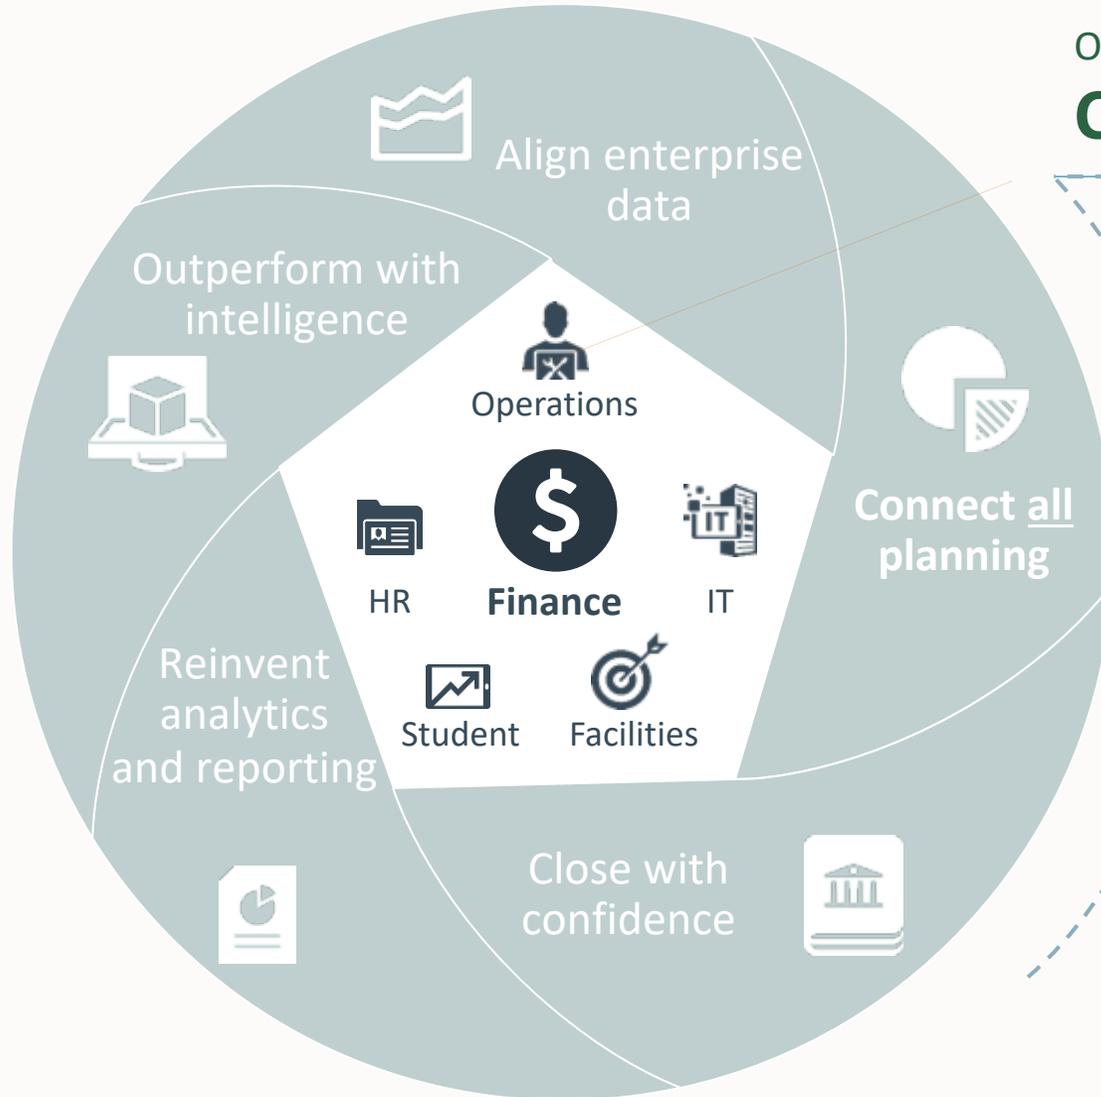

- **Oracle connected finance (EPM)**

---

Marc Seewald  
Vice President  
EPM Product Management

Oracle Cloud EPM

## Connected Finance

Annual Department Budgets

Monthly/Quarterly Forecasts

Long Range Scenario Planning

Monthly Financial Close & Consolidation

Account Reconciliation

Cost of Education Analysis

Budget Books

Metadata Alignment (hierarchies, COA redesign)

# How is crisis planning different?

## Long range strategic planning

## Transformation planning

### Periodicity

Summary (year, semester)

More detailed (semester, monthly)

### Drivers & Assumptions

Traditional assumptions (e.g. trend-based growth rates, etc.)

**Revenue:** Student segmentation, tuition  
**Other:** State funding, donations, endowment return, costs of PPE, capex decisions, etc.

### Frequency of Update

Once every 2-3 years

Annual, Semester, Monthly?

### Relationship to bottoms-up Planning

Target Setting for Annual Budget

Capex, facilities, workforce will complement the broader "Scenario Modeling" efforts

# Plan the Transformation of the Institution

## Strategic Scenario Planning

Create, update, and compare multiple strategic financial planning “what-if scenarios” on-the-fly:

- Best practice for full financial impact to the institution
- Integrated to forecasts for easy updates based on the latest details
- Perform “Goal Seek” to assess the viability of achieving targets
- Run simulations in seconds to de-risk long-range plans

# Predictive Planning

## Faster, more accurate planning through data science (time series regression):

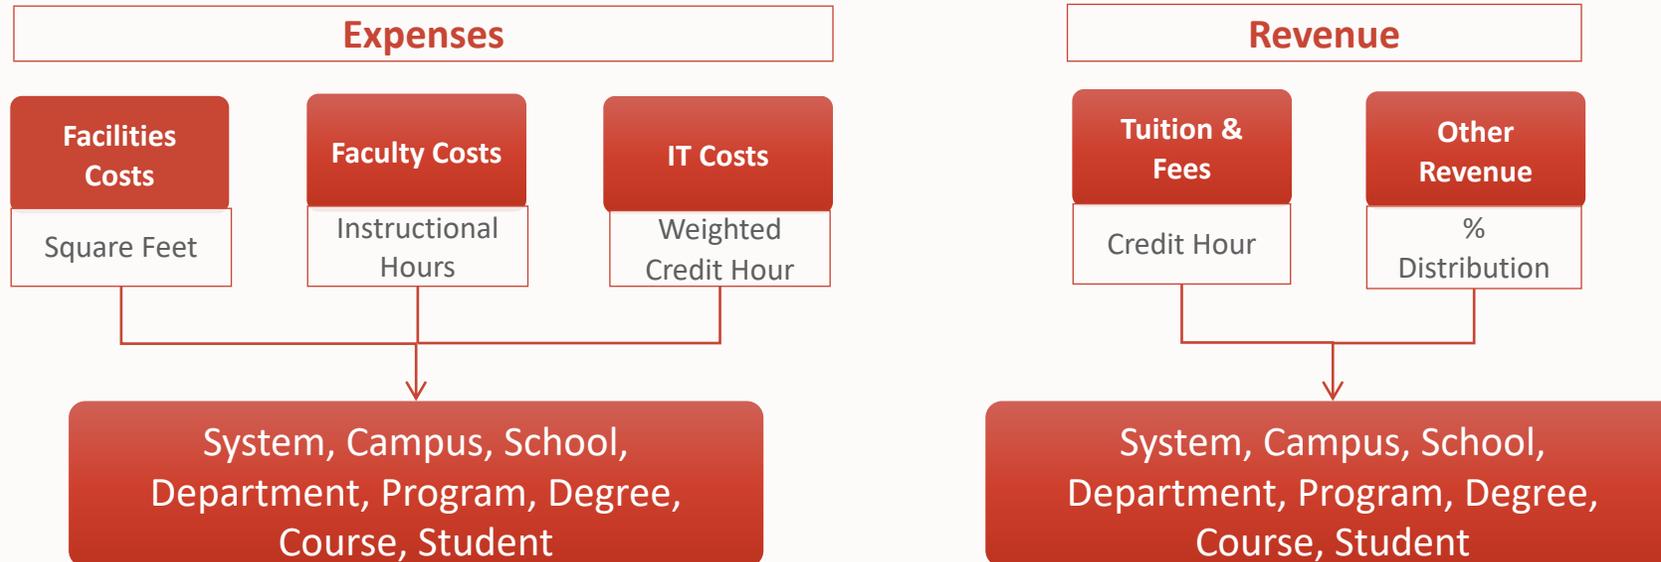

- ✓ Predictive Planning Use Cases:
  1. Generate a forecast
  2. Seed a forecast
  3. Validate a forecast
  
- ✓ AutoPredict (20.08)
  - Easier “forecast vs. prediction” variances
  - Predictions run at data import, and calculated in a ‘Prediction’ scenario

The screenshot displays the Oracle Planning and Budgeting Cloud: Vision interface, showing a table titled "Forecast Variances" for the period Q2 of FY16. The table compares Forecast, Prediction, and Variance for various categories. A red box highlights the "Forecast" and "Prediction" columns, and a red arrow points to the "Auto Predict" label. The "Total Revenue" row shows a forecast of 9,242,537 and a prediction of 9,353,747, resulting in a variance of 111,210. The "Total Employee Expenses" row shows a forecast of 185,936 and a prediction of 28,073, resulting in a variance of 157,863.

Version	Entity	Period	Year	Forecast	Prediction	Variance
Working	International Sales	Q2	FY16			
				5,423,775.01912	5,445,774	21,999
				600,428	593,573	(6,855)
				2,078,800	2,133,434	54,634
				235,181	231,033	(4,148)
				904,353	949,933	45,580
				<b>9,242,537</b>	<b>9,353,747</b>	<b>111,210</b>
				5,800,671	5,837,501	(36,830)
				<b>5,800,671</b>	<b>5,837,501</b>	<b>(36,830)</b>
				132,021	21,650	110,370
				53,915	6,422	47,493
				<b>185,936</b>	<b>28,073</b>	<b>157,863</b>

# Cost of Education Analysis

- **Understand** the current financial stability of a program, degree or course
- **Project true costs** of programs and make pricing decisions based on those costs
- **Transparency** that enables institutions to ensure resources are aligned correctly based on actual measurable information
- **Create accountability** that enables departments to understand the resources they consume as it relates to the revenue that they generate

# Budget Books: Investing in Productivity

## Collaboration:

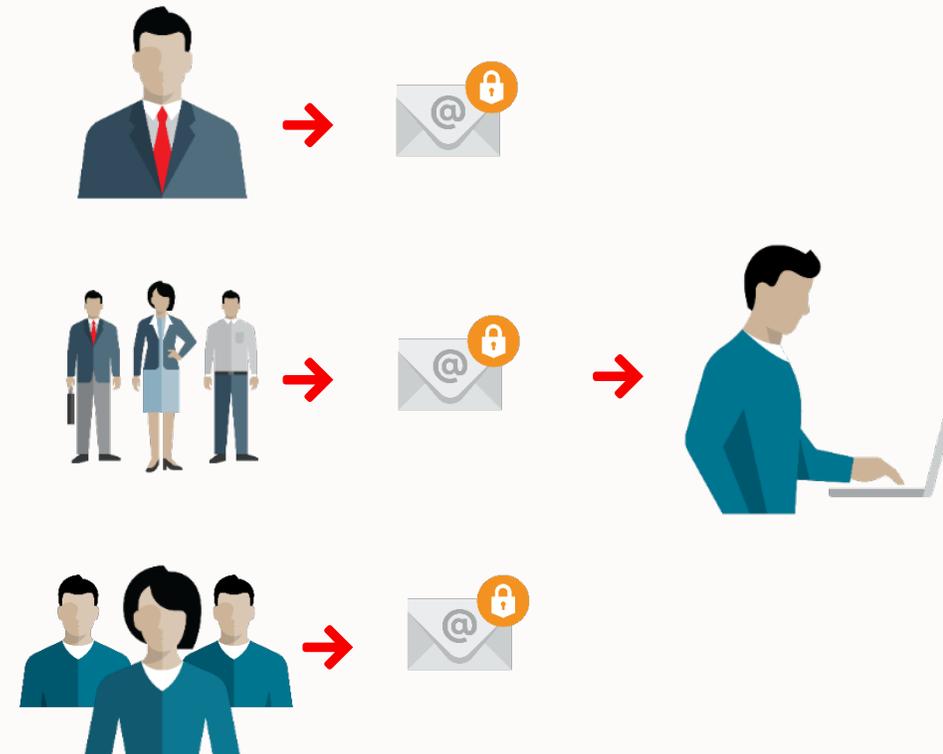

- Facilitates collaboration during work-from-home (WFH)
- In-document commentary
- Quickly assemble content from many contributors
- Full version control
- Creates a repeatable process

## Governance:

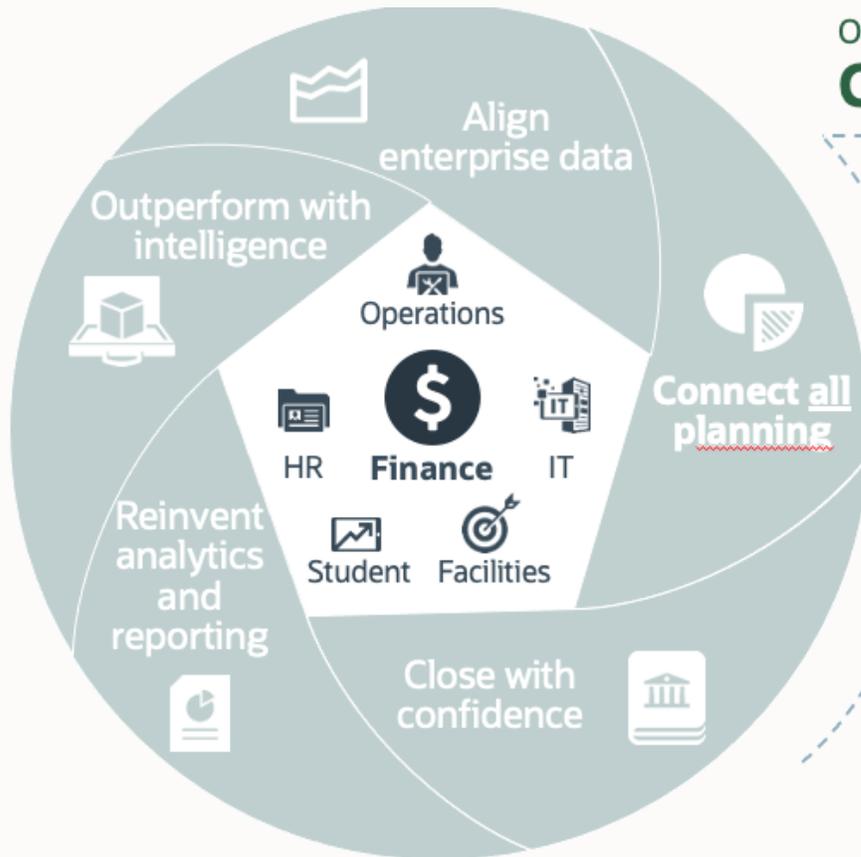

- Assign authors & reviewers
- Data dynamically updated based on latest actuals & forecast
- Manage multiple distribution cycles

## Narrative Reporting

Securely prepare management reports & budget books in real-time

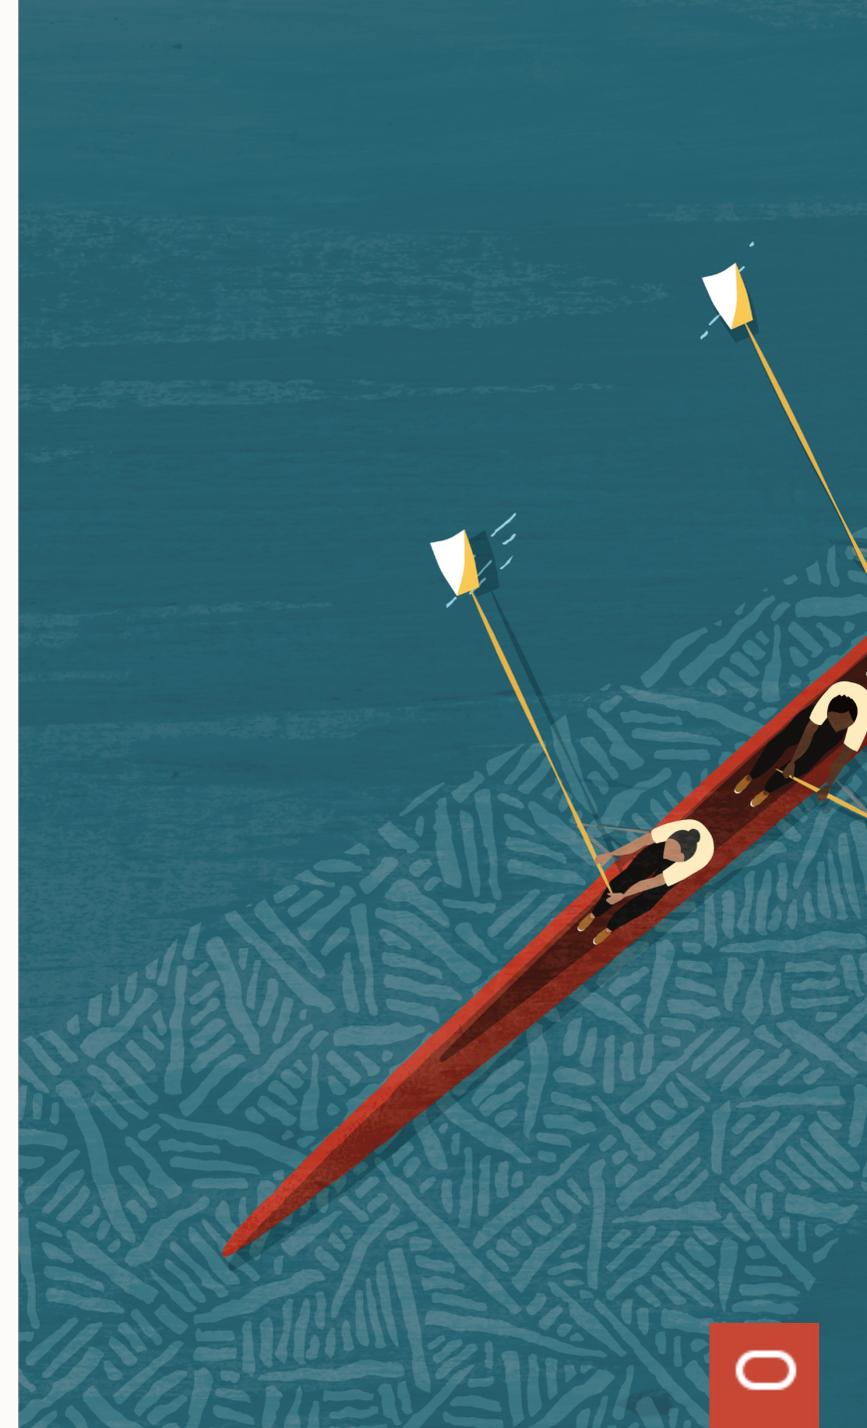

~40-70% reduction in budget book cycle time as compared to manual, offline processing

Oracle Cloud EPM

## Connected Finance

- Annual Department Budgets
- Monthly/Quarterly Forecasts
- Long Range Scenario Planning
- Monthly Financial Close & Consolidation
- Account Reconciliation
- Cost of Education Analysis
- Budget Books
- Metadata Alignment (hierarchies, COA redesign)
